Environmental Policy

Our Policy for the Environment

Our company's objective is to promote forest sustainability, reduce ash and sawdust release, and increase the use of organic, biodegradable, earth friendly raw materials and bring about consumer awareness of the environment, their impact on it, and what they can do to make a difference.

Our company not only manufactures earth friendly products but we are also mindful of our company's impact on the environment. We are committed to conserve natural resources and to treat the planet with respect, and this is reflected in our day to day lives as well as in our work.

Our company takes the initiative to:

- Use of timber from legal and sustainable forest
- Use plantation log as much as possible
- Reduce our use of raw materials that will end up in landfills
- Reuse all materials we possible can
- Implementing measures to reduce pollution, waste and energy consumption
- Promoting increasing environmental awareness within our factory

We believe with our products, our initiatives, and stronger customer awareness, we can together provide a safe work environment for our employees and a safe living environment for our neighbours.

(PEK ENG CHEE)
